

Novel approaches to microbiome therapeutics for immune disorders

Dr. Jose C. Clemente

Associate Professor at Department of Genetics and Genomic Sciences, Icahn School of Medicine at Mount Sinai, New York

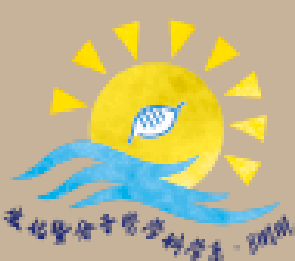

The ability of microbial communities to modulate immune disorders is now well established. Here, the speaker will discuss recent work on the role of microbial therapeutics developed to prevent complex inflammatory disease.

時間：3/22(週五) 14:10 - 15:10

地點：理工三館階梯教室 D104

邀請單位：東華大學生化暨分子醫學科學系
